About Assignment: This is going to be an android mobile app built on React Native , It should be the same as the UI provided with the correct work flow. Also API end points will be called nicely with the details provided. Final outcome should be an apk file to install on an android device.

Time Line : 3 Days (React Native UI Development) 3 Days to bind APIs and Test the App

API Functions to Bind with UI:

- Register User

POST : <https://dropproof-fkczg9e6gta6hydr.eastasia-01.azurewebsites.net/api/auth/register>

Json Payload:

```
{  
    "username": "test",  
    "email": "test@gmail.com",  
    "password": "test",  
    "companyId": 1,  
    "userRole": "Driver",  
    "team": "Delivery"  
}
```

- Login user

POST : <https://dropproof-fkczg9e6gta6hydr.eastasia-01.azurewebsites.net/api/auth/login>

Json Payload:

```
{  
    "username": "ravi",  
    "password": "a"  
}
```
